Boardwalk Exploration
A wooden boardwalk allows for easy exploration of the wetland.

Fort Building in the Forest
The open understory of the mature pine forest offers a great space for creative play. The downed sticks and branches are perfect for constructing temporary forts and other Earth art. Let your imagination run wild!

Woodland Wonders
Stroll around the woodland loop and observe the diverse community of native tree species. Can you spot the white oak, black oak, black cherry, and American elm trees?

Bridge View
Pause for a quiet moment and take in the view from the bridge spanning Portage Creek. See if you can find the high-water mark or where wildlife amble down to the creek for a drink.

TRAIL BLAZES
Look for these symbols on trees to help you find your way.
