Recreation Area
This mowed area is ideal for picnics, Frisbee, or relaxing near the water. Enjoy the view from one of the picnic tables.

Boardwalk Exploration
Extending east from Devil's Lake, a boardwalk provides access to the extensive tamarack swamp. Look for yellow lady's slipper and swamp milkweed. This trail stops at the caretakers' home; please respect their privacy.

Beavering Away
Heading south along the central trail, observe signs of beaver activity. Their characteristic gnaw-marks leave the fallen trees in this area looking like giant sharpened pencils. Be mindful of the troughs created where the beavers drag logs into the water.

Rare Plants
The preserve is home to some remarkable plants we don't often see. Look for pale vetchling on the forested ridge, sweet-scented waterlily in the ponds, and Michigan lily in the open grassy areas.

TRAIL BLAZES
Look for these symbols on trees to help you find your way.
